

Hands on 4

Dplyr

1. Use hflights data and Show the records of AA flights between "IAH" and DFW where the DepDelay is more than 100 minutes.
2. How many Airlines are there in this data?
3. Find the average delay by Origin.
4. Use the mtcars data set and find the top 3 heavy cars.
5. Add a column to this and store the value of the product of mpg and cylinders.
- 6.
